

certify, authenticate, protect

COUNTERFEITS

500 Billion \$

The yearly value of fake goods sold worldwide, growing 15% each year.

CYBERCRIME

4.35M \$ is the average cost of a data breach

33B records stolen up to 2023

14% only of SMBs can defend themselves

automotive

art

wines & spirits

cosmetics

fashion & luxury

pharma

electronics

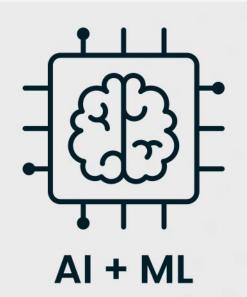

Securely authenticate, trace and verify tangible assets with our cyber-secure solution

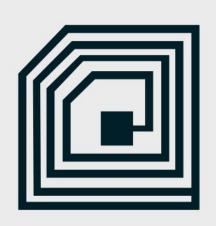

ARCHITECTURE

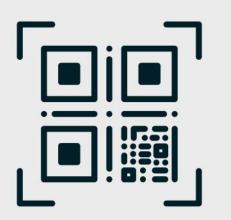

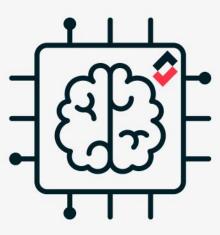

RFID/NFC tags, QR codes and/or any third party ID technology

OUR TECH

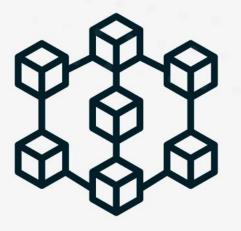

Ransomware protection

Secure and specialized algorithms enhance ID solutions with strong cybersecurity primitives

AI + ML

Trained models are detecting anomalies, patterns, threats and trends in realtime

Databreach resistance

All sensitive data are military-encrypted and stored securely on the blockchain

CUSTOM TAG

Batteryless

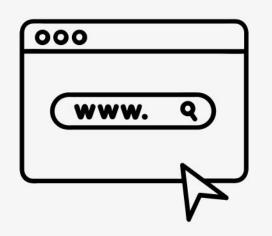

We bring the security of blockchain to tangible assets

Zero trust verification

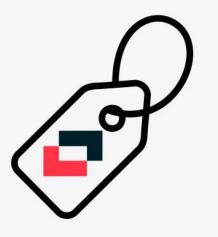

Tamper check

HOW DOES IT WORK

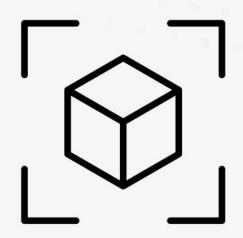

the IDs through our APIs or with the platform

Apply

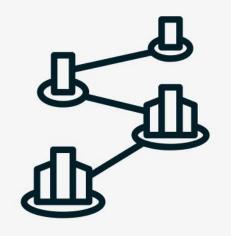

securely the ID to the asset

Scan

to authenticate, verify and trace the asset

COMPETITIVE

Scalable & Robust

Based on microservices, our solution is made to scale and can serve billions of devices

Integration

Seamless integration with existing systems, technologies and industrial processes

Adaptation

Customizable and adaptable to different industries and technologies

certify, authenticate, protect
